

BOARD SYSTEMS FOR INDOOR AND OUTDOOR USE

FROM MINI PLAYING FIELDS TO CUSTOMISED SOLUTIONS: ANYTHING IS POSSIBLE

QUALITY FEATURES

- Frameless sandwich construction for sound insulation, robustness and stability
- Foundationless board installation: no need for expensive foundation and planning work
- Invisible anchorage: even without foundations, our boards won't move.
- Fire protection: our boards are flame resistant.
- Highly robust components, solid and precise workmanship: this ensures as little wear and tear as possible and saves unnecessary maintenance work.
- Our side and roof net constructions are also available for retrofit to DFB (Deutscher Fußball-Bund) mini playing fields.
- Additional sound protection measures on the boards ensure reduced noise emissions

INDIVIDUAL DETAILS

- Multi-sports facilities with goals, basketball nets and an extra high roof net
- Round board sections for indoor hockey pitches
- Board section with integrated door for side entry
- Branding possible over the entire surface as plot or digital printing
- Multi-pitch football centre with removable divider boards
- Boards available in different colours, court size and goal size choosable
- Supply of flame resistant netting possible

Our board system can be used to build football pitches, mini playing fields, playing fields with customised dimensions, noise reducing features or with high quality 4C-Branding - always exactly the way you need them.

ADVANTAGES

THE 3F BOARD SYSTEM: INNOVATIVE. LONG-LASTING. FLEXIBLE.

Anyone who's already bought a board system knows what to look for when making their choice. The amount of planning and the construction costs are considerable due to the foundations required. This drastically increases the overall price.

It's good, then, that our innovative 3F board system can now be used completely without foundations. This will noticeably reduce the strain on your budget.

Discover the innovative solutions, the exceptional quality and the versatility of our 3F board system. Everything that makes a good board system.

**Multi-sports facilities with goals, basketball stands
and an extra high roof net**

APPLICATIONS

THE 3F BOARD SYSTEM: INNOVATIVE. LONG-LASTING. FLEXIBLE.

When Michel Platini officially opened one of our football pitches to mark a Champions League final, it was, of course, the highest accolade for our company. However, when the mini playing field in the local community functions perfectly day-to-day, we consider that to be the real proof that we've done everything right.

It's great that FIFA, UEFA and DFB trust our products - but it's even more important to us that communities and clubs do, too. After all, we want our board systems, football pitches and mini playing fields to always meet the needs of our customers, no matter where they are. And not just for football, but also for hockey, as a border for beach sports and for many other specifications.

Mobile football pitch, Frankfurt trade fair

MILESTONES

- 1994** First mobile, multifunctional board system
- 1999** Mobile football pitches for the first large DFB project
- 2003** First static indoor football pitch system
