

# PROTECTIVE NETTING FOR STADIUMS AND GOLF COURSES

# ELEGANT, LONG-LASTING AND USER-FRIENDLY

Golf protection nets are more than just a matter of trust. Aesthetic considerations also come into play - as it is of particular importance not to spoil the harmonious scenery of the natural landscape - as much as possible. With our netting this is no problem at all.

At the same time, our special FUNTEC Skyline-Nets also fulfil all conceivable safety requirements. At design heights of up to 21 m and possibly more, walkers-by, cars and residents are well-protected. And this at building costs that lie significantly below the costs of conventional protective netting. Added benefits are the ease of care and longevity of FUNTEC nets.

**Elegant safety – Skyline-Netting of FUNTEC**

# GOLF

## ALL BENEFITS OF FUNTEC NETTING AT A GLANCE:

- Design heights of up to 21 m and possibly more
- Design length as requested, several hundred metres are possible
- Aerodynamic assessment & structural calculations
- Adjustment to all topographical features
- Longevity thanks to top-quality netting and materials
- Gentle on the net through FUNTEC Skyline-Technology
- Gentle on the material through rapid disassembly in case of storm warning
- Efficient ball collection through roll-back system
- Elegant and discreet design
- Individual planning to suit requirements

Need for protective netting:  
Residential area next to a golf club

Easy maintenance: Skyline-nets  
can be lowered easy and fast

Elaborated: Skyline-nets assist you with collecting the balls and  
they include animal-friendly architecture

# THE BEST FOR FANS AND PLAYERS

Highest level of safety right down to the smallest detail. This is what characterizes the behind-the-goal nets and throw-over safety nets of FUNTEC and makes us the stand-alone supplier in Germany.

With a minimal construction effort in the stadium our nets ensure unfailing safety for both fans and players. Our nets meet the requirements of fire protection class B1, they are flame-resistant and self-extinguishing. And if the net is not needed for an event, you can simply stow it away in no time.

**Your stadium safety at the highest level  
– High-tech netting solutions from FUNTEC.**

Behind-the-goal netting, coface-Arena, Mainz

# STADIUM

## ALL BENEFITS OF FUNTEC NETTING AT A GLANCE:

- Individual planning and approved statics
- Minimal construction efforts in the stadium
- Optimal integration within the overall structure
- Load limit through tested predetermined breaking points
- Multiple protection against overloading
- Flame-resistant + self-extinguishing netting material
- Minimal obstruction of view for fans
- Does not impair TV images of fan stands
- Calculated wind loads based on aerodynamic assessment
- Quick and easy stowage of nets
- More spectators in the stadium thanks to our variable throw-over safety nets
- Customised solutions - designed to fight pyro-smuggling

Prevents pyro-smuggling:  
customised netting at stairways

Elaborated: minimal-invasive installation  
with multi-safety device

Flexible at all times:  
fast removal and setup

Cost-saving and low-maintenance:  
values for mid-sized stadiums

# AND THIS IS WHAT OUR CUSTOMERS SAY

„We would not have thought that the net installation from Funtec, which is more than 200 m long, would blend into the landscape this harmoniously!“

**Markus Schweiger, Club Manager at Golfclub Olching e.V.**

„With the 16-m high net structure from Funtec we are achieving a high level of safety for the adjoining private grounds.“

**Dieter Kind, Greenkeeper at Golfclub Bad Nauheim e.V.**

„The Funtec net construction lets us achieve a higher occupancy rate of the driving range. This is a real money-saver!“

**Craig West, Managing Director of West Golf, Troisdorf**

„Thanks to the high flexibility of Funtec a new sector demarcation could be installed in record time. This immediately means an increase in spectator capacity.“

**Markus Schweiger, Clubmanager Golfclub Olching e.V.**

„Funtec has met our requirements with regard to the behind-the-goal netting at the Mercedes-Benz-Arena with great commitment and to optimum effect.“

**Thomas Weyrauch, Project Management at BAM Deutschland AG**

„Funtec was able to provide a technically advanced behind-the-goal netting solution very quickly and at a rather good price/performance ratio.“

**Markus Gladys, Technical Manager at SGL Arena, Augsburg**

# QUALITY

## REFERENCES

Since 1994 we have been erecting protective netting for soccer boarding systems and on beach volleyball courts, since the FIFA World Cup 2006 in Germany we have been supplying football stadiums with behind-the-goal nets and since summer 2010 we have also been erecting safety netting for golf courses. Reference examples of our work are:

- Behind-the-goal netting, 8 stadiums at the FIFA World Cup 2006
- 2nd generation behind-the-goal netting, 7 Bundesliga stadiums
- Stade de Suisse, Bern, behind-the-goal netting
- St. Jakob-Park Basel, behind-the-goal netting
- Stadium Thun/Switzerland, behind-the-goal netting
- NV Arena St. Pölten/Austria, behind-the-goal netting
- Georg-Melches-Stadium Essen, lateral stand netting
- Weser-Stadium Bremen, throw-over net protection
- Glücksgas-Stadium Dresden, throw-over net protection
- Volkswagen Arena Wolfsburg, access area net protection
- West Golf Troisdorf, golf skyline-netting 16 x 160 Meter
- Golfclub Bad Nauheim, golf skyline-netting 18 x 120 Meter
- Golfclub Syke, golf skyline-netting 12 x 105 Meter
- Golfclub Olching, golf skyline-netting 12 x 200 Meter
- Cologne Golfclub, indoor golf netting
- Frankfurter Golf Club, golf skyline-netting 18 x 200 Meter
